

“We Know Blockchains”

Chainfrog Oy is a software development company specializing in adding blockchain functionality and connectivity to your company's database systems with a product called Blockbinder. Our Blockbinder product connects blockchains and databases seamlessly without extra effort, and allows you to spin up a blockchain pilot in minutes.

We have ten years combined blockchain experience, and an agile startup approach. We are the first blockchain technology company in Finland with 6 U.S. patents pending and 1 granted. Chainfrog Oy has reliable and competent business partnerships in both software and hardware to complement the Chainfrog Oy offering.

The company is also available for blockchain consultancy, partnering and development services.

Chainfrog Oy has a professional team with references in the blockchain business. Our technical team is highly qualified:

- Our CEO Dr. Keir Finlow-Bates is a mathematician from Cambridge and a PhD from London and he has been involved in researching blockchain technology for over 8 years. He has also lectured in Tampereen teknillinen yliopisto and is a mentor for PhD students.
- Our CTO Jon Callan has a background in developing silicon chip level software for the ARM processor and has taken part in demanding software and hardware cases.
- Our Sales and Marketing Director Meiss Marten has a background in IT sales and account management, and is currently completing her master's thesis on blockchain and digital rights management.
- Our business development manager Kimmo Rouhiainen has experience in Business Development, civil engineering and manufacturing and, and our office manager Salla Salmi has experience in Creativity and Design.
